

WILSON LLANOS

AI ENGINEER

AI Engineer specialized in building production-grade Generative AI and LLM solutions: Hybrid RAG (vector search + SQL queries), multi-agent systems with LangGraph and MCP, LLM evaluation (Eval Harness), and Deep Learning, delivered end-to-end on Azure (Azure AI Foundry, Azure AI Search, Azure SQL). Background in backend software engineering (Python and .NET), data pipelines, and systems integration, with hands-on LLMOps, Observability, data governance (LGPD), and FinOps. MBA in Artificial Intelligence and Big Data from USP (ICMC).

TECHNICAL SKILLS

- **LLMs & Gen AI:** Multi-agent Systems (LangGraph, MCP) • Hybrid RAG (Azure AI Search) • LLM Evaluation (Eval Harness) • Context-Aware AI • PII Masking & Privacy (MS Presidio) • Azure AI Foundry • LLMOps & FinOps
- **Systems Integration:** ETL Pipelines • SSIS • SQL/T-SQL • Databricks • PySpark
- **Cloud:** Azure (AI Foundry, AI Search, Azure SQL, Functions, Service Bus, Databricks, Application Insights) • Docker • Git
- **Programming & ML:** Python (FastAPI, pandas, numpy, scikit-learn), C#, .NET, REST APIs, PyTorch, XGBoost, MLflow

KEY PROJECTS

Multi-Agent Hybrid RAG for Tier 1 Support Automation | LangGraph, Azure AI Foundry, AI Search, Azure SQL | 2026

- Engineering a multi-agent system with LangGraph and Hybrid RAG to automate Tier 1 support for a coffee logistics platform, combining vector search (Azure AI Search) and relational database queries (Azure SQL) via Tool Calling, with reasoning powered by Azure AI Foundry. Designed a governance and security layer with Microsoft Presidio for dynamic PII anonymization (LGPD compliance) and implemented telemetry and cost tracking (FinOps) in Azure Application Insights.

Multi-Agent System for Incident Resolution with LangGraph and MCP | Python, AI Foundry, AI Search, Azure SQL | 2026

- Built a multi-agent system focused on automated triage and reducing the Mean Time to Resolve (MTTR) for IT incidents. Implemented the orchestration of asynchronous routes and state management using LangGraph, ensuring secure communication through the MCP (Model Context Protocol) standard. Connected Azure AI Foundry reasoning to the operational context via RAG with Azure AI Search, utilizing Azure SQL for memory persistence and auditing. Adopted a Spec-Driven Development (SDD) approach to govern autonomous agent behavior, defining explicit tool contracts and a tiered human-approval model to constrain agent scope and mitigate the risks of unsupervised execution.

PROFESSIONAL EXPERIENCE

Systems Developer | EISA - Empresa Interagrícola • Jan 2026 – Present

- Engineering an AI solution leveraging a multi-agent system with LangGraph and hybrid RAG on Azure Cloud to automate Tier 1 support for a coffee logistics platform
- Developed event-driven communication (Azure Service Bus + .NET), enhancing integration monitoring
- Manage critical ERP-logistics system integrations, synchronizing 50k+ records/day with 99.9% accuracy
- Optimized ETL pipeline with SSIS, drastically reducing processing time
- Implemented bidirectional flows for migration of 70+ processes with zero downtime

Programmer Analyst | EISA - Empresa Interagrícola • Feb 2025 – Dec 2025

- Developed ETL processes (Azure Functions, SSIS) processing 1M+ records/month with 99.8% accuracy
- Created analytical reports (Reporting Services, Crystal Reports) for the entire commodity logistics process
- Promoted to Systems Developer after exceeding goals, completing deliveries ahead of schedule

Support Analyst | EISA - Empresa Interagrícola • Apr 2022 – Jan 2025

- Provided technical support to users, diagnosing and resolving system, database and infrastructure issues, reducing recurring tickets.

EDUCATION

MBA in Artificial Intelligence and Big Data | ICMC / USP | 2025-2026

Bachelor's in Civil Engineering | UNINOVE | 2012-2016

CERTIFICATIONS

Microsoft Azure Data Fundamentals (DP-900) | Microsoft | 2025

ETL Pipeline and Machine Learning with Apache Spark | Data Science Academy | 2025

LANGUAGES

Spanish: Advanced (fluent)

English: Upper-Intermediate (Listening and Reading advanced, Speaking intermediate)
